Summary

Results-driven Business Analyst and Consulting professional pairing a rigorous analytical STEM foundation in Biology with technology consulting experience at Accenture. Proven track record owning operational workstreams, conducting root-cause business process analysis, structuring data-backed solutions, and designing executive deliverables. Adept at breaking down complex, ambiguous challenges, managing cross-functional alignment, and leveraging emerging AI workflows to drive sustainable operational performance.

EDUCATION

Texas State University, Bachelor of Science in Biology | Double-Minor in Psychology and Pre-Med

May 2026

EXPERIENCES

MathHappens, Austin, TX

May 2023 - Present

Program & Operations Intern

- Managed end-to-end program logistics, resource allocation, and multi-site execution across Austin learning centers, maintaining operational consistency and quality.
- Prototyped, tested, and deployed functional learning tools and process materials using CAD technology, creating standardized guidelines for ongoing deployment.
- Represented the organization at premier industry conferences (e.g., SXSW EDU), presenting methodologies and aligning delivery objectives with institutional partners.

Accenture, Austin, TX

Skills To Succeed Intern: Operations Consultant Intern

June 2025 - August 2025

- Directed operational workstreams supporting healthcare client processes, establishing and enforcing strict Standard Operating Procedure (SOP) compliance across multiple enterprise platforms.
- Cross-referenced, mapped, and audited multi-platform process documentation and operational codes, eliminating discrepancies and ensuring data integrity.
- Executed daily quality assurance and data validation cadences to identify workflow bottlenecks and optimize operational efficiency.
- Leveraged Generative AI tools and prompt workflows to evaluate client business case scenarios, developing actionable recommendations for process enhancement.

Accenture, Austin, TX

June 2024 - August 2024

Technology Consulting Analyst Intern: Skills To Succeed Program

- Participated in daily Agile stand-ups and sprint alignment sessions, tracking workstream milestones, managing deliverable timelines, and escalating delivery risks.
- Gathered and analyzed business requirements to assess client operational challenges, delivering data-backed recommendations to support digital and process transformation.
- Designed and delivered structured executive presentations, briefings, and status dashboards for leadership and client stakeholders to communicate project progress.

The Trail Conservancy, Austin, TX

August 2024 - January 2025

Ecological Restoration Intern

- Directed operational execution and safety protocol compliance for 30+ large-scale field initiatives, coordinating tasks across diverse cross-functional teams.
- Maintained data tracking systems via GivePulse, auditing participation records and generating data validation reports for executive review.
- Utilized GIS platforms to monitor site metrics, translating complex environmental data sets into structured operational reports for project planning.

Breakthrough Central Texas, Austin, TX

June 2022 - September 2022

Teaching Fellow Intern

- Designed, structured, and executed curriculum delivery schedules, monitoring milestone achievement and performance metrics for cohort participants.
- Facilitated regular cross-functional alignment sessions with instructional cohorts to standardize operational delivery and resolve engagement challenges.

HONORS & PROFESSIONAL DEVELOPMENT

Dell Technologies World 2026 | Selected Student Cohort | May 2026

- Competitive Selection:** Selected as the first, 1 of 13 students nationwide for an exclusive enterprise technology cohort, collaborating directly with industry leaders on emerging technologies.
- AI & Workflow Certification:** Earned dual certifications in Generative AI Foundations and Prompt Engineering, applying advanced AI workflows to optimize organizational problem-solving and efficiency.

SKILLS & COMPETENCIES

Consulting & Operations: Business Process Mapping, Requirements Gathering, Standard Operating Procedures (SOPs), Workflow Optimization, Agile Methodology, Project Lifecycle Management, Stakeholder Management.

Systems & Data: Process & Data Validation, Quality Assurance (QA), Microsoft Excel (Modeling/functions), PowerPoint, Teams, GIS Mapping, Enterprise ERP Concepts.

AI & Innovation: Generative AI Workflows, Prompt Engineering, Process Automation Analysis.

Languages: English (Fluent), Spanish (Native/Bilingual).

IBM Early Professional Hiring Team

IBM Consulting

Austin, TX

RE: Application for Associate Consultant – SAP 2027 (Job ID: 129113)

Dear IBM Early Professional Hiring Team,

I am writing to express my strong interest in the Associate Consultant – SAP 2027 opportunity within IBM Consulting in Austin. As a recent graduate combining an analytical STEM foundation with hands-on experience in technology consulting at Accenture, I have developed a deep appreciation for structured operational execution, business process optimization, and standardizing complex workflows. I am eager to bring this discipline to IBM to help enterprise clients modernize their operations through SAP and cloud transformation.

During my time as an Operations Consultant Intern at Accenture, I directed operational workstreams supporting healthcare client processes, where adherence to Standard Operating Procedures (SOPs) and data integrity were mission-critical. I routinely mapped and cross-referenced multi-platform process documentation, eliminating workflow discrepancies and maintaining rigorous quality assurance standards. Additionally, through my previous Technology Consulting Analyst internship, I actively participated in daily Agile stand-ups, gathered client requirements, and translated complex progress data into actionable executive briefings. These experiences honed my ability to understand end-to-end business processes, facilitate cross-functional alignment, and keep project deliverables on schedule.

My academic training in Biology has provided me with strong quantitative reasoning and structured problem-solving habits, while my dual certifications in Generative AI and Prompt Engineering have reinforced my ability to quickly adopt emerging enterprise technologies. Furthermore, participating as one of 13 students nationwide in the Dell Technologies World cohort strengthened my desire to operate at the intersection of business strategy and scalable enterprise platforms.

I want to start my consulting career at IBM because of the focus on solving real business problems directly alongside clients while continuing to build my skills. I am excited to bring my experience in managing operational workstreams, standardizing processes, and team collaboration to this role, and I would love the opportunity to discuss how I can support the Austin team and your clients.

Thank you for your time and consideration.

Sincerely,

Alexa Hernandez-Lopez
